

## Questioning Research Data Archiving and Access Infrastructures

1) Who are stakeholders in Nairobi research data and how do they relate to each other?

2) What industries and thematic areas have produced research data in/on Kenya? What themes do you see as gaps/missing data?

5) What laws and policy have addressed research data?

3) How have the economics of research shaped how data is collected and used? What future economies are imagined and planned?

6) What kinds of labor has contributed to and go on within everyday data practices in Nairobi? How is “public participation” organized, encouraged, valued or discounted in research?

4) Describe what capacit(ies) (and incapacities) exist for research data infrastructure in this setting?

7) What educational programs -- academic, civic, media, STEM and so on - - are addressing research data, cut by what vested interests and incentives?
